### **EXAMINER'S AMENDMENT**

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on 23 September 2011, agent Timothy Murphy requested an extension of time for 1 MONTH(S) and authorized the Director to charge Deposit Account No. 21-0279 the required fee of \$130.00 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1 now reads as follows:

--A pulse detonation wave engine detonation system comprising:

a plurality of detonation banks, each detonation bank having a plurality of detonation chambers for receiving a fuel/oxidizer mixture from a fuel/oxidizer source;

an optical ignition subsystem independent of, and positioned apart from, the detonation banks for generating a plurality of optical pulses, the optical pulses igniting each fuel/oxidizer mixture such that the chambers detonate in a desired order;

an optical transport subsystem for transporting the optical pulses from the optical ignition subsystem to the chambers in a repeated fashion; and

Art Unit: 3644

an optical multiplexing device configured for separating optical energy such that the optical energy sequentially detonates the banks and simultaneously detonates the chambers within each bank.--

Claim 2 now reads as follows:

--The detonation system of claim 1 wherein the optical ignition subsystem includes:

an optical energy source for generating the optical energy at a predetermined intensity level; and

an optical interface for optically coupling the energy source to the multiplexing device.--

Claim 10 now reads as follows:

--An optical ignition subsystem for a pulse detonation wave engine detonation system, the ignition subsystem including:

an optical energy source for generating optical energy at a predetermined intensity level;

an optical multiplexing apparatus configured for multiplexing the optical energy such that the optical energy sequentially detonates banks of the detonation system and simultaneously detonates chambers contained within each bank, where the detonation banks are positioned independently of and apart from the optical ignition subsystem;

an optical interface for optically coupling the energy source to the multiplexing apparatus; and

an optical transport subsystem for transporting the optical energy from the optical multiplexing apparatus to the chambers in a repeated fashion.--

Art Unit: 3644

Claim 14 now reads as follows:

--A method for detonating a pulse detonation wave engine, the method comprising the steps of:

transporting a fuel/oxidizer mixture from a propellant source to a plurality of detonation banks, each detonation bank having a plurality of detonation chambers;

generating a plurality of optical pulses, the optical pulses igniting each fuel/oxidizer mixture such that the chambers detonate in a desired order;

transporting the optical pulses to the chambers in a repeated fashion, where the optical pulses are generated by an optical ignition subsystem positioned independently of, and apart from, the chambers;

generating optical energy; and

separating the optical energy such that the optical energy sequentially detonates the banks and simultaneously detonates the chambers within each bank.--

Claim 15 now reads as follows:

--The method of claim 14 further including the step of:

generating the optical energy at a predetermined intensity level.--

2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or render obvious a pulse detonation wave engine system configured for separating the optical energy to sequentially detonate the detonation banks and

Art Unit: 3644

simultaneously detonate the chambers within each bank, in combination with the other limitations of the claim(s).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph W. Sanderson whose telephone number is (571)272-6337. The examiner can normally be reached on M 6:30 am - 11:30 am, T-F 6:30 am - 300 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy D. Collins can be reached on (571)272-6886. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
